

1994

THE LEADER BY INNOVATION

CRESTLINER

*The care of hands-on craftsmanship teams with the precision of modern technology to make Crestliner the leader in beauty, strength, performance and innovation.*

*All our boats have strong, smooth, dependable UniWeld® aluminum construction—no rivets to vibrate loose and leak.*

*Our 10/20 year warranty is simply the strongest and best in the industry.*

**B**oard a new Crestliner and you'll discover right off that you're surrounded by innovation. Innovation that's as much a Crestliner trademark as the quality and craftsmanship we've built into every one of our boats. Innovation that's led the industry for years and left other boat companies scrambling.

The Crestliner difference begins with the all-welded rigidity, stability and strength of our smooth-riding, wave-slicing Tru-V UniWeld® aluminum hull. An unequalled design born of a blend between high-tech manufacturing and hand-crafted care. Some manufacturers won't invest the time or technology to deliver the strength of a welded hull but it's standard on every Crestliner.

Built-in strength and rugged dependability have made Crestliner the obvious choice for many state and federal agencies. Now that reputation has spread to Europe as Germany's Red Cross and the Bavarian Rescue Team has made Crestliner the boat they rely on, too.

But our Tru-V UniWeld® hull is only one of the reasons we remain the leader by innovation. Another is our 10/20 year warranty. It continues to be the industry's strongest, something you won't find from other boat manufacturers. As a matter of fact,

you won't find any of our innovations in boats from other manufacturers. Our patented Bow Conversion® is still the fastest way to convert a runabout floor plan into a fishing machine. The Pocket®, our mini-outboard transom, lets you add a kicker

outboard without an add-on bracket. Our SST® (Space Saver Transom) gives you more room in the cockpit while it improves performance and handling. The closed cell foam we use on every boat we make provides an extra measure of safety and flotation. Our plush boat seats' no-pinch safety hinges add a measure of safety as well as comfort. These are just a few of the innovations we've pioneered over the years.

*The patented Crestliner SST increases cockpit space, cuts engine noise, improves performance.*

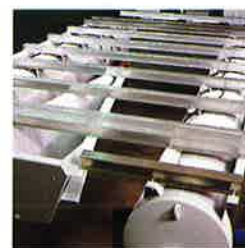

*Every Crestliner uses closed cell foam to meet or exceed Coast Guard flotation regulations.*

1994 is a brand new year. Still, the leadership continues. We're proud of our new innovations and know they'll add much to your boating experience. Look for features like our ICU™ (Intensive Care Unit) livewell system. It automatically mixes air as it draws in water for true aeration that keeps fish longer. The drop-down changing room we've added to our fishing pontoons gives you privacy when you want it yet stows quickly overhead and out of sight. Our Uni-Weld Hydro Tech pontoon transom mounts on a heavy gauge aluminum frame for a ride that's smooth and effortless. We've

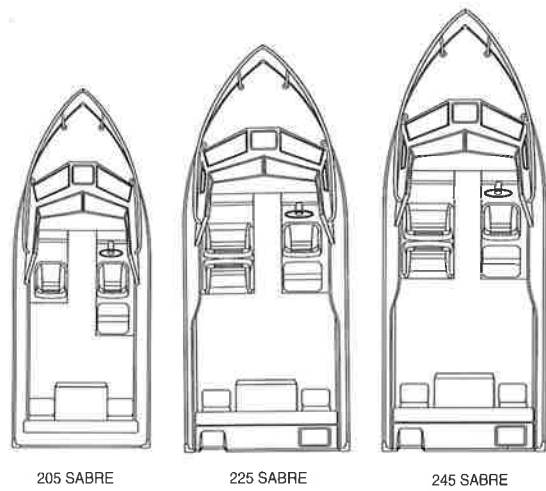

*The best of times are the hours you spend with your family, your friends and your Crestliner.*

extended our line of Jon boats to deliver more versatility, more choices than ever. And, once again this year we've designed a hot new graphics package with colors and styles that sizzle like never before. All this adds up to a Crestliner line that's packed with more value than ever. A line that sets new standards for performance, quality and comfort. A line that is, once again, out in front of the industry, riding the crest of boating breakthroughs, leading by innovation.

## SABRE

205/225/245

**S**leek lines, sassy looks and color coordinated graphics and interiors tend to cover up the fact that the Sabre line is really a fleet of rugged fishing machines. Don't be fooled. Look a little deeper and you'll find hard-working extras like the deep Tru-V UniWeld aluminum hull, built-in tackle trays, 136-quart ICU fishwell and other features that prove these boats are built as much for performance as they are for beauty and comfort.

V205 PHANTOM I/O

C R E S T L I N E R  
P H A N T O M I / O  
185/205

Smooth-sided elegance and Crestliner innovations make our Phantom stern drive the best dual purpose boat you can buy. For skiing, the Phantom is a bow rider with ski storage, swim platform and tow ring. When it's time to fish, our patented conversion bow flips open to a fishing platform with ICU fishwell, rod storage and prewired trolling motor receptacle. Add custom graphics, baked acrylic paint, custom dash with tilt steering and you've got a boat that's best in both worlds.

# SPORTSMAN

13/14W/14DLX/16/16DLX/17XL

Year in and year out, these rugged little rigs have proven to be the backbone of American boating. Our Sportsman models may be low priced but they still come with the same welded construction, superior quality and durability that you've come to expect from every Crestliner boat. See your dealer about our special value packages on the new Sportsman Deluxe models.

CRESTLINER

JON

1044 - 1648

Virtually every option you could want in a Jon boat is now available in a Crestliner. These 10 models outperform anything in their class. They're rugged yet light enough to toss on top of a car or inside a pickup bed. They're fully welded so there are no rivets to shake loose and cause leaks. They carry our 10/20 warranty that continues to lead the industry.

Your Authorized Crestliner Dealer

The innovations you find at Crestliner don't start and end with our boats. That's because our commitment to innovation runs through every part of our business. That includes our dealers. Crestliner dealers are different. They're not as much sales people as they are advisors. They take great pride in knowing the Crestliner you buy is the one that's right for the way

you boat. So you'll find that they spend more time listening, they ask a few more questions and they give straighter answers than competitors. That's because our dealers are out to make more than just a sale. They're out to make sure that every time you board a Crestliner, your experience will be as special as the boat itself.
